

Control, security and efficiency

USER PRODUCTIVITY AND SECURITY IN ONE PACKAGE

Epson Print Admin is a server-based solution that creates a secure printing, scanning and copying environment through user-authentication with card readers, logins/passwords and PIN codes. It also offers additional features such as 'scan and send to me', employee-education notifications and enhanced administrative tools that provide welcome boosts to productivity, environmental goals and efficiency.

Whether your staff produces important legal documents, patient records or financial reports, Epson Print Admin gives you a complete overview of your printing, copying and scanning volumes. This enables the controlled reduction of your operational expenses.

Epson Print Admin empowers you to monitor outlay, volume and key metrics from an individual, departmental and company level – and use them to make decisions on where to restrict or increase printing allowances. Together with our WorkForce Pro inkjet range, which uses up to 94% less energy than competitive laser alternatives¹, and produces up to 96% fewer consumables¹, it's a software solution that provides maximum printing efficiency.

¹Epson saves up to 94% energy used while printing comparing the Epson WorkForce Pro WF-C878RTC model with 64 competitive laser devices in the Australian 21 to 44ppm A3 colour MFD segment as of 1 July 2021. Storage space comparison based on Epson calculations of storage space requirements for packaged consumables sufficient to print 6,000 pages on 12 SFP and MFP (3-in-1) printers selected from among the top-selling 50% of A4 monochrome laser printers.

Evaluate freely

All the benefits of EPA are yours to enjoy for free – with no time limits – on up to two devices. If you acquire more devices, simply purchase additional licenses through EPA's easy-to-understand, easy-to-implement license scheme.

Please contact Epson for more information.

Enhance productivity

Personalise the user interfaces on compatible devices to specific employee profiles so they spend less time looking for the right functions, and more time getting things done. The 'scan and send to me' feature, for example, increases productivity by sending an email with the scanned document attached to the authenticated user at the touch of a button.

Administrate easily

Epson Print Admin's web-based interface provides advanced print, copy and scan functionality through a single interface. Simple to access and use, it enables you to optimise your fleet quickly.

Reduce waste

Documents are only printed once the user releases the job at a compatible device. This eliminates the most common cause of print waste – forgetfulness – while simultaneously enhancing security.

Integrate with ease

EPA allows for seamless integration into your current IT infrastructure, regardless of whether your system is LDAP-based or not.

Educate employees

Notifications can be set up to educate users about responsible printing. That way, you can discourage users from unnecessary or wasteful full-colour printing at the point of print job creation.

Secure device use

User profile authentication protects against unauthorised use of your devices, creating a secure printing, scanning and copying environment. Employees are identified using ID cards, typed login credentials or a pin code.

Control and monitor costs

With built-in cost-saving rules that can be activated in seconds – and the ability to create rules specific to your print environment – Epson Print Admin puts you in control. You can even create customised reports to conduct specific analysis, or choose from a wide range of reporting methods to best display your data.

EPSON OPEN PLATFORM

Epson Print Admin works in conjunction with Epson Open Platform – software which allows you to adapt our business inkjets and multifunction devices to suit your needs. EOP helps you unlock their potential and meet changing requirements as your goals and IT systems evolve.

EPA-supported hardware

WF-C20600 WF-C20750 and WF-C21000 Enterprise Models

60ppm, 75ppm and 100ppm A3 Colour MFDs
(pictured above base model (left) and configured with Booklet Finisher)

WF-M21000

100ppm A3 mono MFD

WF-C878R WF-C878RTC WF-879R and WF-C879RTC Models

24ppm, 25ppm desktop and floor-standing A3 Colour MFDs

WF-C529R and WF-C579R

24ppm single and multi-function A4 colour printers

Hardware

CPU: 2.0 GHz or faster processor
RAM: 2 GB or more
Hard disk free space : 50 GB or more (except for database capacity)
Display: 1024 x 768 or higher

Notes

1. Make sure the system configuration matches the current environment, such as network communication speed, number of multi-function devices and number of users.
2. You cannot install this system on a server being used for domain control.
3. The system does not support a Multihomed computer environment.

Operating System

| OS | Service Packs | Edition |
|------------------------|---------------|------------------------------------|
| Windows Server 2012 | - | Essentials / Standard / Datacentre |
| Windows Server 2012 R2 | - | Essentials / Standard / Datacentre |
| Windows Server 2016 | - | Essentials / Standard / Datacentre |
| Windows Server 2019 | - | Essentials / Standard / Datacentre |
| Windows Server 2022 | - | Essentials / Standard / Datacentre |
| Windows 10 | - | Pro / Education / Enterprise |
