Versatility and Efficiency for Kiosk Applications

New EU-T400 Series Kiosk Solutions

Epson is proud to introduce its new EU-T400 series for kiosk applications. Virtually unknown until a short while ago, the rapid growth of kiosk has matched the explosive growth of the Internet and other technologies. With an astonishing range of applications and unlimited potential for growth, kiosk requires a compact and reliable terminal that is versatile enough to meet the demands of the future, as well as the present. The EU-T400 series meets all these needs and more. Designed specifically for kiosk, terminal manufacturers are sure to be impressed by its high performance and the ease of developing applications software. Surely the most suitable unit for self-service terminals on the market today, it's another sure-fire winner from Epson.

Possible Kiosk locations

Scene 1 : at Casino floor

Kiosk terminals can be located wherever people gather.

Scene 2 : at Shopping mall

Superior design

Compact

Designed to fit into terminals of all sizes, compact dimensions and a small footprint make the EU-T400 series perfect for smaller terminals.

Internal paper roll

The paper roll for the EU-T400 series is loaded inside the unit. Unlike conventional printer units, the dimensions with and without full size paper (roll of 203 mm) are almost the same.

Highly durable

High durability reduces cost of ownership. The EU-T400 series allows printing of up to 300,000 receipts.

Easy operation

Full front operation

Downtime is reduced with paper loading, maintenance and sensor adjustments all carried out at the front.

Worry-free paper handling

It's simple to replace the paper roll with the EU-T400 series. A semiautomatic loading function saves recovery time and increases the speed of maintenance.

Easy maintenance

Each mechanism can be replaced on a module basis.

Easy to replace the paper roll

Semiautomatic loading function is included.

Step 1 : Push the lever, open and pull down the top frame until it is fully open.

Step 2 : Set the paper roll

Step 3 : Put the paper in the paper guide. The paper will load automatically.

Step 4 : Return the frame to its previous position.

Versatile printing

High speed printing

The EU-T400 series allows faster transactions for customers with the highest printing speed in its class. The same speed is possible with graphics.

Adaptable graphics printing

Text, barcodes, logos and Windows® fonts can all be printed with ease. Embellish and emphasize with underlining, enhancement, 90° rotation, black and white reversing and enlargement.

Selectable paper size

Terminal manufacturers can adjust the unit to meet their specific needs. Paper width, paper diameter, paper core diameter, and paper thickness can all be selected as desired.

Asian language options

Japanese, Chinese (simple and traditional) and Korean fonts are available as factory options for local markets.

Advanced Printer Driver

Available for Windows® 95/98/NT 4.0 and 2000, and Linux®, Epson's ever-adaptable printer driver reduces the time and expense spent on applications development.

With a status monitor and a maintenance counter providing information on present and historical operating status, the EU-T400 series is fully equipped for a wide range of kiosk applications.

APPEARANCE

SPECIFICATIONS

Model	EU-T432
Print Method	Thermal line printing
Paper Path	Straight
Print Font	
Font	Font A : 12 x 24 / Font B : 9 x 17 / Kanji : 24 x 24
Column capacity	Font A : 48 columns / Font B : 64 columns
Character size	1.25 (W) x 3.0 (H) mm
Character set	95 Alphanumeric, 37 International, 128 x 11 Graphic
Interface	RS-232 / IEEE 1284 Bi-directional parallel
Data Buffer	4 KB
Print Speed	150 mm / sec.
Paper Dimensions	79.5 ± 0.5 mm x dia. 203 mm max.
Paper Thickness	0.06~0.15 mm
Power	24 VDC ± 2.4 V
Power Consumption	Approx. 5.1 A (print duty 25%)
Reliability	
Receipt printing	3 x 10 ⁵ times
Printer life	Mechanism: 15 x 10 ⁶ lines / Thermal head: 100 km (62.14 miles)
Overall Dimensions	194.7 (W) x 170.6 (D) x 350 (H) mm (8" type)
Mass	Approx. 3.9 kg (8" type)
Power Supply (option)	PS-170
Factory Options	Loop Guide (for 600 mm Receipt issuance), Paper Supply Spacer, Multilingual Font Set, Paper Near-end Sensor

OPTION

- PS-170 (option)
- Power supply unit

ESC/POS® EPSON took the initiative in introducing ESC/POS, a POS printer command system enabling versatile POS system construction with high scalability. Compatible with all types of printers and displays, this proprietary control system also offers the flexibility for easy future upgrades. It has become popular in the world.
