Actual copy times will vary based on system configuration and page complexity. For more information, visit www.epson.com/copyspeed | 1 R14X Black ink pack prints about 50,000 pages. R14X colour packs print about 50,000 pages on average. Actual number of pages will vary. Replacement ink pack yields are based on testing with ISO/IEC 24712 patterns with Epson's methodology in Default Mode, printing continuously. Yields may vary considerably for reasons that include images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink color. All ink colours are used for printing and printer maintenance. For print quality, part of the ink from the included cartridges or ink packs is used for printer startup and a variable amount of ink remains in the ink pack after the "replace ink pack" signal. | 2 In accordance with ISO/IEC 24734. | 3 Not all media types are supported for PCL printing. | 4 Wi-Fi CERTIFIED[™]; level of performance subject to the range of the router being used.
