NETWORK CONNECTIVITY

Project presentations over the network,

transmitting both audio and video with a single connection.

You can also connect wirelessly, via a network access point, to promote collaborative sharing and an engaging work environment. Easily monitor/control networked Epson projectors remotely, using the RJ-45 connector and EasyMP® Monitor software. You will save time and maintenance costs by powering projectors on and off without having to go to each individual room and by setting schedules for automatic events. You can also receive email alerts when attention is required.

SHORT THROW
AND ULTRA SHORT THROW

With an Epson short throw or ultra short throw projector, presenters are able to deliver rich multimedia content without the distraction of glare in their eyes, or shadows on the board disrupting the vision of their audience.

Make the most of your available space with Epson's range of innovative projectors.

EDUCATION MODELS

The Epson range of ultra short throw projectors are available in an education specific configuration; denoted by an "e" on the end of the name.

Visit www.epson.com.au for more information.

Finger touch interactivity – no pens required!

With the finger touch interactive model (EB-595Wi), multiple users can annotate on the interactive area using a combination of 2 pens and up to 6 fingers at the same time! Perfect for classroom collaboration.

Start lessons instantly with instant annotation!

Why wait for a PC to start up before you start your lesson? Interactive functionality is also available without a PC connection, so drawing on the projected screen is now possible when connected to other devices such as document cameras or DVD players.

BUSINESS
INTERACTIVE

MeetingMate™ interactive projectors provide the complete solution for any meeting room.

A perfect alternative to copyboards and other presentation equipment, MeetingMate™ combines multiple devices into one simple device that enhances collaboration through interactive functionality, idea creation and content sharing — all without a PC!

Meeting**Mate**
collaborate. create. share.

PC Free Whiteboard

With the whiteboard function, you can start a meeting "instantly" without the need for a PC! Simply walk into the meeting room and switch to whiteboard mode and start writing notes or annotating images. The control pad facilitates these functions with simple and intuitive command buttons. What's more, the function buttons on the control pad are replicated on the remote control, so it's never been easier to get going.

Whiteboard Sharing Mode

The whiteboard sharing function allows collaboration from multiple devices participating from different locations*. Content can be shared and annotated simultaneously by participants collaborating from mobile devices, computers and other MeetingMates. Connect up to 15 devices directly to the MeetingMate with no PC required!

Save, Print, Email or Share

At the end of your meeting, you can SAVE, PRINT or EMAIL your meeting notes instantly, it's that easy!

SAVE your meeting notes on a USB drive or the network drive. Never lose any of your meeting notes again!

PRINT your meeting notes wirelessly or to the network printer, so all team members can walk away with the action points.

EMAIL the meeting notes from the whiteboard to your email address.

* ALL DEVICES MUST BE CONNECTED ON THE SAME NETWORK

LARGE VENUE

Powerful performers that are easy to install, manage and maintain. Epson's range of installation projectors offers up to 12,000 lumens of colour/white light output for captivating presentations in virtually any venue. Featuring WUXGA resolution and innovative 3LCD technology, these projectors deliver brilliant images in lecture halls, conference centres and entertainment venues.

OPTIONS
AND ACCESSORIES
Air Filters
Regularly replace the air filter in your Epson projector in order to maintain image quality and to ensure longevity.

Lamps
Order genuine Epson lamps to ensure that you achieve the best possible image quality and colour reproduction.

Speakers
Enhance the audio experience with the Epson ELP-SP02 powered speaker set.

Control Pad
A simple cable management solution from Epson. Ideal for classrooms and meeting spaces.

HDBase-T
Eliminate the need to run expensive cables and signal repeater hardware by using the Epson HDBaseT transmitter.

Installation Frame
The Epson ELPMB44 installation frame is designed for portrait projection and stacking (Z-series only).

Ceiling Mounts
Ceiling mounts to suit all models of Epson projectors.

Wall Mounts
Epson wall mounts, designed specifically for use with Epson ultra-short throw projectors, provide flexibility and numerous adjustment options for ease of installation.

Table Mount
Epson ultra short throw table mount has been specifically designed to project on table surfaces, providing extra flexibility and creative solutions.

Interactive Pens
Annotate just as you would with a pen, and interact just as you would with a mouse. An essential accessory to your interactive projector.
Portable Screen
Epson portable, light weight 80 inch screen is the perfect display solution for your home or office.

Document Cameras
Capture and share a much wider range of information with Epson document cameras.

Wireless LAN Adapter
A simple yet powerful solution to enabling wireless connectivity to your Epson projector (optional models only).

Quick Wireless Key
A quick and simple solution to connecting your PC to the Epson projector with zero configuration.

Soft Carry Case
Ideal solution for storing and transporting Epson mid-range projectors.

3D Glasses
EPSON 3D glasses to suit compatible 3D projectors.

COLOUR LIGHT OUTPUT

KNOW YOUR PROJECTOR LUMENS

WHAT IS COLOUR BRIGHTNESS?

Many people are in the dark about colour brightness. Of the numerous specifications to consider when purchasing a projector, this measure of colour light output is among the most important.

COLOUR BRIGHTNESS

is a scientifically set global standard that measures a projector's Colour Light Output. This measure is crucial to gauge the performance of a projector.
LOW COLOUR BRIGHTNESS ▶

◀ HIGH COLOUR BRIGHTNESS

Low Colour Brightness can result in images that are 1/3 as bright!

COLOUR BRIGHTNESS COUNTS

Colour is the keystone of any memorable presentation, increasing memory significantly over monochromatic visuals

86% of presentations contain colour

86%

Colours at peak brightness and saturation attract the most attention

97% of consumers agree that brightness is a key component of image quality

97%
3LCD TECHNOLOGY

Not All Projectors Are Created Equal. Using 3LCD Technology means that you don't have to sacrifice the vibrancy of rich multimedia by projecting a single colour at a time.

3LCD

HERE'S HOW IT WORKS:

1 A light source projects white light onto a combination of mirrors that split the light into three primary colours: red, green and blue

2 Each primary colour passes through a dedicated LCD panel

3 The three colour images are combined using a prism to form a full-colour image consisting of millions of colours

4 The vibrant, full-colour image passes through a lens and is projected onto a screen
