EPSON'S NEW LABEL PRINTER

Epson has released an innovative, fast, versatile and cost-effective desktop label printer that guarantees rapid colour-on-demand printing of highly visible and durable smudge-free labels, tickets, wristbands and other application-critical items on a wide range of media.

The Epson TM-C3400 colour label printer with Epson's patented pigment-based three-colour ink instantly produces highly durable labels on a wide range of media types such as plain paper, fine paper, continuous paper, synthetic paper, die-cut label, PET film, wristbands, etc.. in widths from 25.4 to 108mm. The integrated Auto-Cutter is standard and cuts rolls or continuous paper according to individual specifications.
