For retail business looking to move to a tablet POS system that is affordable and easy to install, the TM-m30 tablet POS printer from Epson is the ideal choice. Thanks to ePOS-Print SDK, the TM-m30 easily communicates with web-based applications, ensuring receipts can be printed quickly and seamlessly from any mobile device.

### Stylish Compact

Sleek, stylish and compact, the TM-m30 is one of the smallest POS printers in the world. Its size means it can be placed almost anywhere, making it perfect for any retail environment and especially those with limited space. Available in black or white, it can be used as a top or front access printer.

### Easy to install

Print directly from any smart device with ePOS-Print on both iOS and Android systems. Additional Ethernet, Bluetooth, USB and Wi-Fi connectivity are available.

### Connectable

A single printer can be dynamically shared across multiple tablets with different interfaces.

### Simple set-up using Wi-Fi

The 'Easy Setting Functionality' on the TM-m30 creates an access point for connecting smart devices. Once implemented, both devices can be easily set-up and configured on a wireless network for instant use.

### Direct Printing from Web Browsers

Epson's innovative ePOS-Print technology means the TM-m30 can quickly, easily and seamlessly integrate with any PC, tablet, laptop or mobile device via a Wi-Fi or Bluetooth interface. Whether the device is running iOS, Android, Windows CE or Windows mobile, direct printing from the web browsers becomes possible without the need to install or update any other drivers.

### Easy pairing with mobile devices

NFC connectivity (Near Field Communication) means the TM-m30 can be easily paired with tablets and smartphones. Simply bring the devices close together to make the connection. For added convenience and flexibility, pairing by QR code is also possible.

### Optional Customer Display

Designed to match the dimensions and colours of the TM-m30 printer, the DM-D30 customer display retains a stylish, integrated look and feel when in use. This adaptable option can be connected to the printer via the USB A port and, if a Wi-Fi dongle is required on the TM-m30, this can be invisibly connected behind the DM-D30.

### Optional Wall Mounting Bracket

Mount the printer quickly and securely to any wall of vertical surface with the optional wall mounting bracket. By simply swapping just two printer covers, the TM-m30 converts from a horizontal to a vertical solution, maximising space even in the smallest retail environments.

### Paper Saving

Using backward paper feeding, or "printing the logo when the receipt is cut" function, the TM-m30 can shorten the receipt's length by up to 30%.

## Product Specifications

<b>DIMENSIONS</b>	127 x 127 x 127mm	<b>WHAT'S IN THE BOX</b>	Printer, roll paper, AC adaptor, AC cable, spacer for 58mm paper, power switch cover
