ADVANCED PRINTHEAD TECHNOLOGY

MicroPiezo is an exotic, unique printing technology, developed by Epson. Its legendary performance, combined with its ability to support virtually any ink chemistry, has forever changed inkjet printer design. As a result, Epson is not driven by the technology, but uses its advanced technology to make possible what was considered impossible.

Epson's latest PrecisionCore print heads deliver outstanding image quality with maximum reliability using the minimum amount of ink. Unlike competing technologies which wear and change over time, PrecisionCore print heads are designed to produce the same output, day after day, with superior colour that is predictable and consistent. While some competitor heads are consumable parts that need to be regularly replaced with associated costs and downtime, Epson PrecisionCore print heads are permanent and covered under warranty.

EPSON® SURELAB™ SERIES

The Epson® SureLab™ series is designed to enable fast and cost-effective photo production. They suit a range of applications including in-house imaging, studio and event imaging, Kiosk and Print-For-Pay operation. They produce durable high quality photo prints and can also be used for a range of value-added material including business and greeting cards, invitations and awards, menus and brochures. They have a lower running cost and output better quality than alternative Dye Sublimation technology. Unlike traditional Silver Halide equipment, they employ no chemicals, require no special handling, maintenance or waste disposal. They are easy to operate, require minimum space, and consume very little power.

Epson Media

It's a magical moment when a blank sheet of paper is transformed into a print. Epson offers an extensive range of Photo, Fine Art, Production, and Specialty media in roll and sheet format. We take a quality base stock and apply a set of specially formulated coatings. The coatings are designed to work with nominated Epson printer and ink types to enable output with superior clarity, brightness, and colour accuracy. Please check the Epson web site for product compatibility and specification details; www.epson.com.au

Exceed Your Vision

As one of the world's most respected performance imaging companies, Epson has set the benchmark for print quality. And in many ways, the products shown in this range guide represent some of the most advanced forms of imaging ever developed.

This is what defines us. In short, it is the way in which we combine engineering and innovation, performance and everyday reliability.

From printing the most intricate photograph to the most precise architectural drawing, no other company has been so focused on developing imaging technology that inspires people to do amazing things.

EPSON® SURECOLOUR™ T-SERIES

Epson's technical printers are designed to produce posters, POS, plans, drawings, maps, CAD, GIS and presentation material. Developed for business, education and retail applications, they are simple to use and feature low power consumption. They output ultra-fine lines and solid fills, with high brightness and colour density, using inexpensive ink that dries almost instantly to become moisture and abrasion resistant. They can be operated stand-alone or as part of a network complete with the latest security support. Most models feature scanner support (desktop &/or Large Format), while some provide job costing, remote management, optional Postscript and print server functionality.

PRODUCT
FEATURES

- CYMK ink set with high gloss and enhanced colour gamut
- Ink dries quickly to enable same-day job turnaround
- Designed for flexible low volume production with 4 x 700 ml ink cartridges and a 2L waste system
- Prints at up to 58 m2/hr with active nozzle status monitoring
- Up to 1440 x 1440 dpi with advanced VSDT and Epson Precision Dot Technology
- Advanced Feed Mgmt System with auto tension control and skew correction
- Integrated Auto Take Up + (optional) blower/dryer
- Advanced Self-cleaning print head with integrated crash guard
- Extremely flexible media handling with support for paper, film, canvas and vinyl
- Runs off a standard 5A 240V power supply
- Shipped with Epson Edge Print Software
- Easy set-up and operation with downloadable print profiles and cost tracking software

- Dual CYMK ink set with high gloss and enhanced colour gamut
- Ink dries quickly to enable same-day job turnaround
- DUAL print heads with fall-back
- Designed for medium to high volume production with 8 x 700 ml ink cartridges and a 2L waste system
- Prints at up to 95 m2/hr with active nozzle status monitoring
- Up to 1440 x 1440 dpi with advanced VSDT and Epson Precision Dot Technology
- Advanced Feed Mgmt System with auto tension control and skew correction
- Integrated ATU + blower/dryer for high-speed roll-to-roll production
- Advanced Self-cleaning print head with integrated crash guard
- Extremely flexible media handling with support for paper, film, canvas and vinyl
- Runs off a standard 5A 240V power supply
- Shipped with Epson Edge Print Software
- Easy set-up and operation with downloadable print profiles, remote management & cost tracking software

- Dual CYMK ink set with high gloss and enhanced colour gamut
- Ink dries quickly to enable same-day job turnaround
- DUAL print heads with fall-back
- Designed for high-volume low-cost production with a 12L CISS & 4L waste system
- Prints at up to 95 m2/hr with active nozzle status monitoring
- Up to 1440 x 1440 dpi with advanced VSDT and Epson Precision Dot Technology
- Advanced Feed Mgmt System with auto tension control and skew correction
- Integrated ATU + blower/dryer for high-speed roll-to-roll production

EPSON® SURECOLOUR™ S-SERIES

Epson's range of signage printers are designed to enable cost-effective durable imaging on a wide range of substrates. The combination of Epson Ink, Print Head, and image processing technology, enables production of material with truly exceptional quality. Our basic 4 colour models produce output that is equivalent or better than competitors with 7 or more inks and the ultimate in colour we have our S80 series with up to 10 inks and PANTONE™ certification.

PRODUCT
FEATURES

- Choice of configurations: high-speed 4 colour or 5 colour with dual white
- Supports direct imaging onto fabrics with a 50% or higher cotton content
- Can also be used for imaging on selected polyester based garments
- Advanced PrecisionCore print head enables imaging in resolutions up to 1440 x 1440 dpi with superior colour quality, outstanding definition and minimal bleed
- Uses cost effective 600 ml ink cartridges
- High Durability with low maintenance
- Supports a wide variety of fabric thicknesses and garment sizes
- Supplied complete with Epson Garment Creator software
- Designed to work with a flat heat press
- Comprehensive single-source warranty with cover extendable up to 3 years (including print heads)

- Advanced 4 colour ink provides an enhanced Gamut with Standard Black to suit premium photo imaging
- Images can be sublimated onto polyester fabrics, pre-treated hard surfaces & material that accepts a poly coating
- Photographic quality imaging at up to 2400 x 1200 dpi
- Fabric production speeds of up to 20m²/hr
- Produce a high quality A1 photo or merchandise print in as little as 45s
- Supports roll media up 610mm wide, 110mm diam & 3kg with an integrated auto-cutter
- Supports sheet media up to A1 with auto roll/sheet switching
- Convenient 50 page max A4/A3 sheet feeder
- 4 x 100ml Ink Tank System
- Uses cost-effective 140ml Bottle based Ink refills
- Designed to work with a flat heat press
- Comprehensive single-source warranty with cover extendable up to 3 years (inc. print heads)

- Advanced 4 colour ink provides an enhanced Gamut with a choice of Standard or High Density Black to suit a wide range of applications
- Images can be sublimated onto polyester fabrics, pre-treated hard surfaces & material that accepts a poly coating
- 720 x 1440 Max dpi with advanced VSDT and Epson Precision Dot Technology for superior image quality
- Production speeds up to 30 m²/hr with an integrated autocutter for flexible sheet based output and optional Auto Take Up for cost-effective roll-based production
- Supports media 0.08 to 0.5 mm thick in rolls up to 150 mm diameter
- 6 L CISS with 1.1L ink bag refills & bulk waste system
- Suits operation with a flat or calendar style heat press
- Supplied with Epson Edge Print software (Win only)
- Comprehensive single-source warranty with cover extendable up to FIVE years (inc. print heads)
- Enhanced user-self maintenance with QR-Code video assistance

EPSON® SURECOLOUR™ F-SERIES

Epson's range of fabric printers are designed to enable flexible production on a range of natural and artificial fabrics. Dye Sub variants can also be used for imaging onto materials that have been pre-treated or will accept a polyester spray. While most models only use a 4 colour ink set, the high grade formulation, in conjunction with Epson Print Head and image processing technology, enables output with a very high tonal depth, colour gamut, and brightness level.
